**PATENT
IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

IN RE APPLICATION OF : Cella et al.
FOR : **TELECHELIC EMISSIVE OLIGOMERS
AND POLYMERS DERIVED THEREFROM**
SERIAL NO. : 10/680,470
FILED : October 7, 2003
ART UNIT : 1711
ATTORNEY DOCKET NO. : 128493/GCRZ 2 00013

RESPONSE TO RESTRICTION REQUIREMENT

Commissioner for Patents
Alexandria, VA 22313-1450

Dear Sir:

The Examiner has identified Group I, claims 1-6 and 15-17; Group II, claims 7-14 and 18-20; and Group III, claims 21-24 as distinct inventions for which restriction is required. Applicants hereby elect Group I, for further consideration on the merits. However, Applicants respectfully traverse the Examiner's identification of Groups I and II as distinct inventions.

Particularly, Applicants first note that the Examiner has failed to set forth any basis in the Office Action as to why Groups I and II are distinct. Moreover, the Examiner has only indicated the two groups to be associated with different subclasses. While this may evidence a burden on the Examiner by keeping both groups in the case, it does not evidence distinctiveness.

Second, Applicants submit that the additional step of reacting the oligomer of step B with a difunctional monomer to form a polymer is not sufficient to establish distinctiveness. For example, step C of claim 7 could be added to the application as a claim depending from claim 1. The Examiner may contend that such a claim is a species to generic claim 1, but since the present application does not contain an unreasonable number of species, such a conclusion does not require such a claim (nor its equivalent, claim 7) to be separated.

In view of the above, Applications submit that Groups I and II should be considered together in the present application.

Respectfully submitted,

FAY, SHARPE, FAGAN,
MINNICH & McKEE, LLP
